

QA Engineer

About Apptimize:

Apptimize is transforming mobile development by enabling mobile teams to instantly change their native apps whenever they want, with zero coding and no re-deployment. We believe mobile apps are how every person will interact with every company, and that mobile development is the future of how people will innovate.

Apptimize is driving the change that will lead to the next generation of mobile innovation, and we need more account executives to support our lead flow. We've been selling for less than 1 year and our customers include Ebay, Rakuten, Vevo, Nook, Flipagram, and Capital One. Join us for the most exciting, rewarding, and accelerated growth period of your life. Candidates often remark we have one of the strongest teams they've ever met (seriously, check out apptimize.com/team) and we're excited for you to join us!

We are looking for curious teammates passionate about new technology, open to giving and receiving feedback without ego, intensely focused on the right things, and committed to our work. We are a team where the right kind of ambition will make us all increasingly formidable and rich. Founded in 2013 in Silicon Valley, we are 2 years old, 15 people, and raised our Series A one year after Y Combinator.

About the Role:

Apptimize views the quality of our software as one of our key competitive advantages. Our customers rely on our software being performant, secure, stable, and correct for hundreds of millions of users. You give us a strategic advantage as a trusted partner to our customers.

Requirements:

- Ability to take initiative, tackle obstacles, identify and solve new problems, shape our QA process.

- Great communication and interpersonal skills.
- Team Spirit. You know the hardest things in life can't be done by 1 person- you need a team to achieve worthwhile goals.
- Experience working with enterprise software
- Action oriented and willing to step in to fill gaps when identified
- Detail-oriented and well-organized
- Work well in an entrepreneurial, team environment and willing to express thoughts and ideas
- Architecting, designing, implementing, and executing test infrastructure for enterprise-class software
- Automated and manual software testing methods (unit, black-box, performance, security etc.) and tools
- Experience in developing automation using SDKs/APIs, specifically Java or any object oriented language
- Expert level scripting
- Software development lifecycle methods and processes (e.g. Agile / scrum)
- UI test frameworks, preferably Selenium, Appium or equivalent, both writing tests and using them to solve challenging problems and scenarios
- Experience with native app dev frameworks: XCode, IntelliJ, Android Studio, etc.
- Data transformation and reporting tools (e.g. SQL)
- Knowledge in HTTP/SSL/TLS protocols

To apply:

If you think you are a fit for a full time role at our office in Menlo Park, please email jobs@apptimize.com with your resume and cover letter.
